This project developed is a CRUD-based blog webpage built with Node.js, Express, MongoDB, and EJS. It will allow users to perform all CRUD operations aside from editing/updating since it's not required at this stage of the project. The goal of this project is to manage, edit, and navigate between the blog pages easily

Features

Features are:
- Create blogs
- Read blogs
- Delete blogs
- Navigation between pages

Project

The pubic folder stores the logo for the main page and tab. As well as indes. ejs for the Structure of this to create a blog page layout. Displays team logo. Views.ejs renders pages with EJS templating. Routes of the routes with CRUD operations and app.js Main file to configure middleware and database connection.

Installation

- Npm installs and nodemon run. Ensure dependencies are installed.
- Mongo database please email for invite
